

Project Plan

I will create a website which allows users to create, edit, delete, or otherwise modify a list of their favourite music. Users will also be able to view the collections which they create

Create:

Users create a collection of their favourite music, this collection is then saved in MongoDB

Edit:

Users can edit an existing collection, either adding or removing music as they choose

Delete:

Users can delete their existing collections

View:

Users can view their own collections
